VOLUME 17

CHAMPION, (Alberta) THURSDAY, June 8, 1935

NUMBER 7

Jock's Waggin' Tongue

Vol. 1 Thursday, June 8, 1935 No. 4

Published in the interest of the residents of Champion and District.

The ladies bath house, a new spring board and other repairs are now a reality at the Bar. Swimming hole, Thank, these beautiful British, made Wedgewood and Don't ask us if the fish are biting, try dropping them a line, but buy them at our store.

We won't vouch for the one but Archie Right says he heard it in a local store. Clerk-Our silk stockings are fast color and go a long way. Young lady customer: Yes I have noticed them running.

We still have a few left 7 foot 4 halter shanks complete with a good snap that snap for about the last foot, freezing.

The Hon. O. L. McHugh and A. B. Higgins were Champion visitors last week.

Build your self a beautiful set of dishes at no cost to you. We are giving them away. With each purchase of \$1.00 we will give you when paid in full at due date one of an equal value, and redeem them with to Messrs. Bailey and Higgins for their fine efforts.

Don't ask us if the fish are biting, try dropping them a line, but buy them at our store.

We won't vouch for the one but Archie Right says he heard it in a local store. Clerk-Our silk stockings are fast color and go a long way. Young lady customer: Yes I have noticed them running.

We still have a few left 7 foot 4 halter shanks complete with a good snap that snap for about the last foot, freezing.

The Hon. O. L. McHugh and A. B. Higgins were Champion visitors last week.

"Your Hardware Merchants"

Old Timer Is Laid

To Rest On Saturday

A large attendance was present at the funeral held on Saturday morning in the Community hall of Mrs. Christine Iverson, at the age of 51, who died at her home Thursday morning. Rev. Fr. Canning hom of the Catholic church officiated, interment took place in the local cemetery, the first to be buried in the new grounds acquired some years ago by the church since it was moved into town.

Mrs. Iverson was an old timer in the district, coming here in 1905. Her first husband, Michael Sullivan died in 1904 and three children were born to them. Mrs. C. Nelson of Champion, Dan, Ponce River and Joseph who died some years ago.

Her second husband survives her as well as two sons, Ivor and Karl, the marriage took place in 1918. Two sisters, Mrs. L. Fath, Champion; Mrs. Max Wilson of Grimsby, Alta.; and four brothers, Vincent Kost, of Akkavik, John, Robert and Joseph of Grimsby, Alta., also survive her.

Vulcan Meets Defeat

Champion and Vulcan clashed on the local diamond on Sunday and provided an interesting game. In the second inning, Alired, Vulcan's hurler, had difficulty with the base and then walking four men. After relief for the remainder of the inning, he again went on the mound and pitched a good game. Champion was forced to replace Walker with Steves in the fifth inning after Vulcan scored six runs. The final score was 9-7 in favor of Champion Battery—Champion, Hargraves, Walker and Steves. Vulcan—Reor and Alired.

Picnic At The Lake

A Social Credit picnic was held at Lake McGregor on June 5th. This picnic was sponsored by the Leonard Social Credit Group. Football, baseball, softball and fishing were enjoyed by all participants. It was a real Social gathering and credit must be given to the sponsors of the good time. After lunch Rev. Peter Dawson of Champion and Mr. H. Allergoth of Mito addressed the gathering. Over 200 people were present and everyone had an enjoyable time. There is no indication that the enthusiasm in the Social Credit movement is waning.

Soper—Gardiner

The marriage of Miss Jean Kathryn Gardiner of Champion and Mr. Lawrence Michael Soper of Vulcan was quietly solemnized at the Wesley United Church mauso in Lethbridge on Sunday afternoon, May 26th. Rev. Hugh Leitch of Drumheller, officiated at the ceremony. Among those attending the ceremony were Messrs Marion and Ethel Gardiner, sisters of the bride, and Messrs. William Walker and C. Thubor of Vulcan. Mr. and Mrs. Soper will reside in Vulcan.

Al. G. Barnes Circus

Lethbridge 11. June

The Al. G. Barnes Wild Animal Circus will exhibit in Lethbridge on Tuesday, June 11th. There will be two performances given starting at 2 p.m. and 8 p.m. The show of the year for the kiddies.

Just a word about the show. This year we have the greatest line up of talent ever presented by the Al. G. Barnes Circus. We have The Dazzling Barnums, The Wallers Troupe, The Bennett Family, Mabel Stark, Captain Terrell Jacobs and a whole arena full of performing forest and land and four kinds of elephants under the direction of Captain Walter McLeale. More than 200 acts are on in this year.

To Wrestle

Frank Beres, formerly of Champion, and now staying at Picture Butte for a few days, expects to spend a few days in Lethbridge this week, in training for a wrestling match. Mr. Beres expects to take part in the wrestling bouts put on by the Barnes' circus in Lethbridge on June 11th.

Don and his boys will hold the Saturday nite dances during the summer in the Community hall. First of the season to be held Saturday, from 9:12. This orchestra has made the Saturday nite dances the most popular in the south country. Come and enjoy an evening of music and dance; admission to these dances is 25c per person.

Champion Theatre

Wednesday, June 12th

Will Rogers

in

"Handy Andy"

He's Busted Loose Again...

There's no stopping him... nor the laughs either when he starts stepping as you never dreamed he would. Absolutely the funniest comedy of his career.

Wednesday, June 12th Show at 8.30

WARNING

All owners of animals running at large within the limits of the Village of Champion will be prosecuted in accordance with By-Law No. 5 of the Village of Champion.

By Order,

The Village Council.

SETTING A STANDARD

Child Labor

In Canada, and in the western provinces particularly, as in many other agricultural countries, laws are enacted and regulations made under those laws from the operation of which the industry of agriculture and those engaged in it are exempted. For example, legislation regulating hours of labor in industry cannot well be applied to agriculture, although there are some idealists who, shutting their eyes to practical conditions, urge that such laws could and should be applied and enforced on the farms as well as in the factories. Workmen's Compensation Acts, passed for the protection of urban workers, are in many respects not applicable throughout the rural sections.

As we proceed to write this article, daily newspapers lie on the desk telling of the complete wreckage of the N.R.A. code governing industry and business generally throughout the United States as a result of a decision of the Supreme Court declaring such legislation unconstitutional, beyond the powers of Congress to enact inasmuch as it encroaches upon and usurps the constitutional rights and powers of the individual States of the Union.

Whatever varying and opposing opinions people may entertain regarding the Roosevelt experiment as a whole, there has been general approval of the provisions in the N.R.A. codes prohibiting child labor in shops and factories. It has been estimated that an army of at least 100,000 children marched out of shops and factories with the establishment of these codes, and there was a widespread belief that thereby the increasing problem of child labor had been solved for the time being at least. Now the protection afforded these children has been destroyed, although it may be hoped that those in control of industry will not revert to the employment of child labor.

Unfortunately, industry accounted for only a small proportion of the 700,000 children under 16 who were listed as working at the time the U.S. census of 1930 was taken. By that time, almost half a million children were found in the ranks of agriculture, to which the codes did not apply. It has been pointed out that the cotton fields, tobacco fields, truck gardens, beet fields, onion fields, potato fields, cranberry bogs, berry farms, hop fields and orchards with each returning season make their demands upon the nation's children, and that to hundreds of thousands of boys and girls, many as young as six, the coming of the end of school sessions means not the beginning of a holiday time of freedom and play but a period of toil that often starts at sunrise and ends at sundown.

Except for the fact that these children work in the open air, their lot is in many respects a harder one than those children in shops and factories, and one can appreciate the yearning expressed by a 12-year-old boy for the day when he will be old enough to get a job in a mill and work only eight hours a day.

The situation in Canada is, of course, not comparable to that in the United States, or in other lands where congested populations eke out an existence and intensive tilage of the land by the whole family is necessary. Furthermore, in Canada our standard of living and education is much higher than in most countries, and in the cotton, tobacco and other fields of the southern States. Canadian parents, as a rule, are more desirous of giving their children the highest possible education than they are to work them as farm hands and profit-making laborers.

But inasmuch as many of our laws which are designed to protect urban workers and which prohibit child labor are not applicable to agriculture, a greater responsibility is thrown upon parents engaged in agriculture to protect their children from the eye-sight of the humanities, the frailties, the limited powers of endurance of young boys and girls, and to remember that their proper physical development and mental outlook on life necessitate hours of play and recreation; that their bodies and minds will be stunted by long hours of work and no play. It is still true that all work and no play makes Jack a dull boy.

This is not to say that farm boys and girls should not be required to assist in the work of the farm, they should. Doing chores is part of their education and preparation for life. It would be both foolish and wrong of them to do for them what they should do for themselves, or permit the development of habits of idleness or shiftlessness. But inasmuch as definite laws for their protection from what may be termed exploitation do not apply in rural as in urban life, it is all the more necessary that rural people guard against selfishness and thoughtlessness on their own part in the matter of overworking children on the farm.

Canada stands high in the matter of child labor. It is a matter of national pride that this is so. We stand high in the matter of education, and our school attendance laws afford the greatest legal protection against the exploitation of child labor, both in city and country. It should be the aim of the Canadian people as individual citizens to raise the standard of child life progressively higher, as the more necessary that rural people guard against selfishness and thoughtlessness on their own part in the matter of overworking children on the farm.

Belgium is the most densely populated country in the world, having nearly 8,000,000 residents occupying an area of 11,752 square miles.

Live "Dragons" At Zoo

Habitants Of Dutch East Indies Taken To London

There were live dragons in King George's Silver Jubilee celebrations, but they did not take part in the procession.

There was a pair of them and they were seen for the first time by the public at the zoo.

Komodo dragon is their full name, though learned people speak of them as monitor lizards. They came from Komodo Island in the Dutch East Indies, whence they were brought by Lord Moyne who has been there studying their habits in the wild state. Some of the animals in their native habitat are 12 feet long, and their near-related, extinct Australian species grew to 50 feet. And these it is that are supposed to have been the originals of the dragon legends throughout the world.

Seen travelling erect on their four legs—not crawling like the alligator—with their long heads carried aloft and the tips of their long tails sweeping the earth, they are indeed capable of inspiring fright in the primitive mind.

The pair given to the zoo are the most interesting and valuable reptiles in this wonderful collection and some striking photographs of them in their native surroundings accompany the exhibits. They were kept in the zoo sanatorium for a few days so that the keepers might study their habits, and were then put on view for the first time on the King's Jubilee Day.

A Magnificent Statue

Cleaning Revolved Effigy Of Black Prince Is Pure Gold

The Black Prince—or at least his statue—is no longer black.

For centuries the statue over his tomb in Canterbury Cathedral has been cleaned by the most expert workmen in his native surroundings accompany the exhibits. They were kept in the zoo sanatorium for a few days so that the keepers might study their habits, and were then put on view for the first time on the King's Jubilee Day.

Then, about a month ago, it was Centuries of grime and a coating of protective enamel were delicately removed under the direction of Prof. W. W. Moore.

A most beautifully wrought effigy in pure gold on a foundation of bronze was revealed. It is in almost perfect condition.

The most magnificent tomb in England," is Professor Triest's description. "I clean the cathedral regularly," the Dean of Canterbury said, "but for some reason, I really don't know why, it never occurred to anybody to clean the Black Prince. Now that we have done so everybody is delighted, and we are having a great many visitors. The tomb is one of the most lovely monuments in the world. Its value is incalculable."

Gasoline Discovered

Unable To Explain Gasoline Reservoir Near Charlie's Surface

At large underground lake of pure gasoline was discovered in the harbor district near Wilmington, California, causing hundreds of persons to stampede the scene.

Shallow wells, most of them dug to a depth of only two feet, were producing from four to six gallons of gasoline an hour.

The scene, a low area between two blocks square, was dotted with hundreds of gasoline "prospectors," some of whom brought hand pumps to speed up production. Motorists filled the tanks of their automobiles and trucks.

Chief Ralph Scott, at a loss to account for the gasoline reservoir beneath the earth's surface, said that the discovery of the gasoline leak many years ago in a pipe line leading from a refinery to a harbor terminal.

More Counterfeiting

Advances Made In Science Make Danger More Threatening

The United States secret service conceded advances in science have made counterfeiting a more threatening racket than ever before. Statistics prepared by Chief William H. Moran showed there were 999 arrests and 566 convictions for this offense in 1930, while in 1934 there were 2,751 arrests and 1,603 convictions. Officials declared the perfection of photo engraving processes and the underworld to turn out illegitimate currency in a much more efficient manner.

Construction of the Canton-Hankow railway in China is progressing so rapidly that the line may be in operation this year.

ALL FOOD MADE HER ILL

Caused by Acidity—Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse I was talking to, "over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, it would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse K.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of this is the mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the complete elimination of all waste matter every day. And that means a complete end to indigestion.

A Remarkable Personality

British Empire Suffers Great Loss In The Death Of Col. T. E. Lawrence

The death of Col. T. E. Lawrence—known to the world as "Lawrence of Arabia"—to be by sheer personal influence, has yielded. "Lawrence of Arabia" was not a mythical god; he was a real man, a real personality, a real strain about the man, so remarkable were his powers of leadership and influence.

Lawrence, only 46 at death, and a graduate of Oxford, unquestionably helped to the winning of the World War on its Eastern front. It was he who, by sheer personal influence, quelled friction among the Arabs and roused and marshalled them against the Turks. He helped materially toward Allenby's victories in Palestine. He was a strange combination—scholar, soldier, mystic and adventurer. He was a person of remarkably effective force projected into a romantic and difficult setting. Lawrence was as unobtrusive as he was effective. He was a person of policy man so far as self was concerned. Unlike the Pharisees of an earlier day in the life of the East, he sought no greetings in the marketplace or chief seats in the temple and at feasts—Regina Leader.

Lac Seul Project

Rising Of Water Causes Damage To In South Africa

Rising of the waters of Lac Seul in northwestern Ontario has caused damage to the road bed of the Canadian Northern Railway. Hon. H. Stewart, minister of public works, told the House of Commons, explaining a vote of \$175,000 in the present session for the project. The project is to be raised under an agreement between the Dominion and the provinces of Ontario and Manitoba in connection with power developments.

The money will be used for rip-rapping along the railway and contributions to the cost of the work will be sought from both Ontario and Manitoba.

In Memory Of Livingstone

Statue Of Famous Explorer Erected In South Africa

A famous explorer's memory has been perpetuated by a memorial erected almost at the edge of the Devil's Cataract, of the Victoria Falls in South Africa, where their roar is always to be heard and the spray of tumbling waters ever visible. The memorial is in the form of a statue of Dr. David Livingstone, and was unveiled by the Hon. H. V. Moffatt, a former Premier of South Rhodesia, and himself nephew of the famous explorer and missionary. The memorial to the famous scout and discoverer of the Falls has been provided by the Federation of Caledonia Societies of South Africa.

Economical Air Transport

Aerial Train Can Drop Gliders At Different Points

A Soviet aerial train took off in mail week from Moscow on an experimental flight and landed four and a half hours later at Kharkov, about 400 miles away. It consisted of one regular aeroplane towing three gliders each manned by a pilot. The idea of such aerial trains is that individual gliders can drop at all desired points without the main aeroplane landing, thus providing swift economic air transport.

Russia Making Rubber

Oil Waste And Calcium Used In New Process

New processes for making synthetic rubber out of the waste products of oil refineries and from calcium carbide are being tried out in Russia.

Heads of the Soviet industrial authorities expect shortly to be manufacturing the product at the rate of 20,000 tons a year.

This will have far-reaching effects on the rubber-growing plantations of the Far East, and will put considerably the working of the Rubber Restriction Scheme, under which 30 per cent of the trees are not being tapped so as to force up rubber prices.

The first factory for manufacturing rubber from oil waste is now being started in Moscow. The lessons learned there will be applied in the construction of several large plants in the oil well districts.

About 35 pounds of rubber are produced from the waste products obtained from refining a ton of oil. In the past these products in many cases had to be wasted.

The other process, for manufacturing rubber from calcium carbide, is to be operated at Erivan, in Armenia, where a factory is now being constructed. The process is the invention of a number of young Soviet scientists working in Leningrad. Water is added to the calcium carbide, forming acetylene, the gas of which is often used for lighting. Then, after a series of chemical reactions, a substance called chloroprene is produced, thus ultimately becomes rubber.

The rubber, said to have all the working and wearing qualities of real rubber, and to be very much cheaper.

Best Aid To Sleep

Formula For The Perfect Night-Cap Has Been Evolved

It is generally recognized that the best aid to sleep is warm milk; and that the main use of all night-caps is to keep the head warm, thus removing from hot milk the unpleasant taste which prevents so many people from drinking it regularly at night. Since tea is the cheapest beverage in the world, and the one that is in every family cupboard, it is in the common belief highly desirable. A formula for the perfect night-cap has now been evolved. Tea should be made in the usual way, which means that one teaspoonful of leaf should be allowed for each person and one for the pot. The pot should only be filled half way, and when pouring out after the usual four to five minutes infusion, the cups should be only half filled. They should then be filled up with hot milk, but not with boiled milk.

Twenty-two million cups of tea are drunk in this country every day. The six billion cups of a year. The tea industry is therefore one of the farmer's greatest allies, for investigation has shown that the number of people who drink tea without milk is almost negligible.

Welcome Heavy Rain

Australians Glad To See "Knock 'em Down" Variety

Darwin, Northern Australia, recently welcomed the annual "knock 'em down" rains.

Although this aboriginal description of the torrential downpours, which herald the end of the wet season, sounds grim, the rains are very welcome throughout the Northern Territory. These heavy downpours towards the end of the monsoon period level the long grass which earlier falls have caused to grow to a height of six to ten feet. In the three months following Christmas, about 40 inches of rain fell in the area, and the grass bordering the roads was so high that a man driving along the road could not see a friend walking along the footpath. In low-lying sections of the city grass grew in a tangled mass ten feet high. That is why "knock 'em down" rains are welcome.

A Great Salesman

The greatest salesman of the Empire was the Prince of Wales. On a hot day, once, according to Lord Dudley, he talked in Rio de Janeiro for more than an hour. As a result of his efforts, the Prince of Wales received an order for a \$15,000,000 contract. Lord Dudley told the story at a meeting of the Iron and Steel Federation of which he is president.

A blind philanthropist has given \$200,000 for the cure of blindness, working towards prevention and cure.

'Tis Jolly To Be Wise!

There is a lot more pleasure in rolling a cigarette with Ogden's Fine Cut—a tobacco you KNOW will pass your own tests for smoothness, coolness and fragrance.

Smart "roll-your-owners" everywhere are "wise" to Ogden's. They'll tell you that Ogden's Fine Cut and "Chanticleer" or "Vogue" papers make the right combination for rolling smooth, satisfying cigarettes.

Your Pipe Knows Ogden's Fine Cut

An Old Organization

First Holstein Society Started In Germany In 1872

Cattle resembling the present-day Holsteins have been bred for centuries along the north shore of the North Sea, from Holland over to Denmark. Some of the early imports into the United States came from the German province of Holstein, just south of Denmark. A breed society of that name was started in 1872. But most of the early importations came from Friesland, a province in the north bordering on the Zuider Zee and a Dutch-Friesian State was started in the States in 1878. These two merged in 1905 with the name of the Holstein-Friesian Association of America. Although the most of the foundation stock of the breed came from Friesland the name has stuck. The Holstein-Friesian Association of Canada having been formed in 1891.

New Type Of Tent

Framework Of Airtight Cloth Tubes Has To Be Inflated

A pneumatic tent recently displayed in London must be pumped up. In place of the customary centre pole and guy ropes, the shelter has a framework of airtight cloth tubes which may be blown up with an ordinary motor-car pump when the camping site is reached. When it is erected, the tent is six feet high, seven feet square. Deflated, it fits in a suitcase.

KIDNEY TROUBLE

will result in headaches, backaches, broken sleep, and a tired, listless body being during the day. At the first indication of any of these symptoms, take Gin Pills for prompt, safe relief. You'll feel better, look better and sleep sounder.

GIN PILLS
FOR THE KIDNEY

The Champion Chronicle

L. A. STARCK
Editor and Publisher

Thursday, June 6 1935

A strong wind, from the north Saturday noon, carried a heavy cloud of dust before it as it came rolling down, whipping and whirling things around in its path, and it was quite dark while it lasted, lights having to be turned on. A light shower followed, there was another shower Monday night, every one is needed as with the strong growth the ground is getting drier. Fields are beginning to wave in the breeze.

A part at the back of the Hardware store has been fitted up to handle the machinery repairs of George Depon which have now been moved from the old office that he has occupied for a number of years.

Miss Florence Ulrich who has been visiting in Portland for the past few months returned to Champion last week. Miss Ulrich will take charge of G. K. McLean's office during his absence on holidays and also assist in the Municipal office.

The home of Dr. Freeze has been redecorated.

Mr. Williams, school inspector from Lethbridge, inspected the public school rooms Wednesday.

F. G. Beaumont, Barrister of Carmangay will be at the Chronicle office every Tuesday.

Two cows belonging to Geo. Taylor were killed by the train at noon Saturday. A third cow was badly crippled.

Champion High School students are planning a picnic at the river on Sunday next. Each student is requested to bring a visitor.

Dr. Strohan and Miss West R. N. left for Calgary Saturday.

Mrs. Woodhull and A. E. Woodhull were Cardston visitors over the week end.

Mrs. Sargent, of the Peace River country, is visiting her daughter, Mrs. Nellie Smith.

FOR SALE—Two good milk cows. Apply to Champion Machinery.

Correction—It should have read in last week's notice, the funeral of Mrs. Ferguson's father, not mother as stated.

For the Young Man, our new Snap Brim all wool feather weight felt hats, \$1.95 and \$2.95 at Campbell's.

Mr. and Mrs. C. McLean, Miss Elsie McLean, Miss Doris Simington and G. K. McLean expect to leave at the end of this month, by motor, for various parts in Ontario.

Mrs. Oscar Hogg entertained at a party on Saturday, May 25th in honor of Jean's fourteenth birthday. A number of girls from town and district were present and Jean was the recipient of many lovely gifts.

Those extra smart New Suits that many of our Men Friends are wearing are all Tailor made to their individual measurements and come from Campbell's.

Grading commenced this week and an extensive program of road work is to be carried out. The roads west and north of town being the first to receive the attention of the grading outfit.

Mr. and Mrs. Orvil Harper expect to leave at the end of this week for British Columbia where they will look for a new location. Mrs. Harper was the guest of honor at a tea, held at the home of Mrs. Hammond of Carmangay this week.

Local & General

Mr. and Mrs. Fred Watts and Patricia were Nanaka visitors on Sunday.

Dr. and Mrs. E. H. Freeze returned to their home in Champion on Saturday.

Tomato Juice, Finest quality canning tomatoes. Special 60¢ each at Campbell's.

W. Bozarth Jr. returned to Vancouver this week, after spending a few months in Champion.

A special service will be held in the United Church Sunday, June 9th, **TENTH ANNIVERSARY OF UNION—1925-1935**. You are all invited to this special service.

Born To Mr. and Mrs. Art Larson (nee Belle McPhail), of Peace River, 10-lbs., on Saturday, May 25th, a daughter, Margaret Anne.

Lovely new Voile Dresses, as cool as they are Dainty. All individual styles waiting for you at Campbell's.

Miss Spinkie received word from her parents at Ensign that their car was stolen Tuesday evening. Mr. Spinkie had left the key in the car.

Miss Freda Bastin, student nurse at the Vancouver General Hospital, arrived in Champion on Monday and will spend her vacation at the home of her parents.

Watermelons, Canteloupes, Pineapple, B. C. Berries and plenty of Fresh Cream, Ice Cold at Campbell's.

Invitations have been issued for the marriage of Miss Doris Taylor to Mr. Donald Bond in Carmangay on Wednesday, June 12th, at the United Church.

Mrs. J. Castator, who has been visiting in Vancouver returned to Champion recently. Mr. and Mrs. Barringer, who accompanied her remained at the Coast, the former having taken a position for the summer months.

Mrs. Ella Beutler left for Calgary Thursday evening, after spending a few days in the city she will leave for Edmonton, where she will attend the session of the Grand Chapter of the O. E. S. of Alberta.

Miss Cameron was hostess at two tables of bridge on Thursday of last week. Those present were: Mrs. F. Clever, Mrs. G. M. Campbell, Miss Martin, Miss J. Anderson, Mrs. Price, Mrs. Lamont, Mrs. McIntyre, Mrs. J. Walker and Miss Henderson.

Teacher Wanted

Champion Consolidated S. D. No. 40 requires a female teacher holding first class certificate. Duties to commence 1st Sept. 1935. Apply on or before June 11th, giving references and experience to G. K. McLean, Sec. Treas., Champion, Alta.

The accompanying chart shows how the price of gasoline to the retailer has decreased and the gasoline tax has increased since 1925. The data for this graph are based on figures published by the Dominion Bureau of Statistics.

LOWER PRICES—HIGHER QUALITY

EVER since 1920 the price of gasoline has steadily declined. Few people realize this however because during the past ten years as the price dropped the tax increased. In 1923 there was no provincial gasoline tax and the average price of gasoline to retail dealers across Canada was 27 1/2 cents per gallon. Today the average price of gasoline to retailers is 18 1/2 cents but to this is added a tax of from six to eight cents per gallon which goes directly to the provincial governments. Not only has the price of gasoline fallen steadily since 1920 but the quality has

consistently improved. The gasoline consumer today gets more value than ever before.

Sometimes you hear talk of large profits earned by the gasoline refiner. In 1934 Imperial Oil earned \$3,023,400.12. This may seem to be a large sum but to earn it Imperial Oil had to make and market gasoline and other products amounting in value to \$82,841,311.15. That is to say Imperial Oil's earnings were relatively no greater than those of a merchant who, selling \$8,280 worth of goods in the course of a year, made a net profit of \$300.
